## Section Editor-in Chief

**Dr. Vittorio M.N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Section Editor-in-Chief

Optical Sensors Section is a section of *Sensors* (ISSN 1424-8220). It publishes original peer-reviewed papers covering all aspects of Optical Sensing. Both theoretical and experimental papers and comprehensive review are considered. This Section addresses all aspects of optical sensors, including source and detection technologies, sensor architectures, sensor performance, processing approaches and applications, as well as actuation and control by light. These optical sensors and actuators include micro- and nanodevices, large devices, sensor arrays, as well as several materials and technologies for a very large number of applications. The Section provides a platform for the publication of original and scientific research that is likely to have a large general impact and also has the aim of initiating Special Issues.

*Sensors* (ISSN 1424-8220) is the leading international peer-reviewed open access journal on the science and technology of sensors. Its latest impact factor in 2019 is 3.275, ranking Q1(15/64) in the JCR 'Instruments & Instrumentation' subject category. Its 2019 Citescore is 5.0, ranking Q1(17/129) in Scopus 'Physics and Astronomy: Instrumentation' category. Manuscripts are peer-reviewed and a first decision provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days.

## Call for reading

### Real-Time Dual-Wavelength Time-Resolved Diffuse Optical Tomography System for Functional Brain Imaging Based on Probe-Hosted Silicon Photomultipliers

David Orive-Miguel, Laura Di Sieno, Anurag Behera, Edoardo Ferocino, Davide Contini, Laurent Condat, Lionel Hervé, Jérôme Mars, Alessandro Torricelli, Antonio Pifferi and Alberto Dalla Mora  
*Sensors* **2020**, *20*(10), 2815; doi: [10.3390/s20102815](https://doi.org/10.3390/s20102815)

### Simulations and Design of a Single-Photon CMOS Imaging Pixel Using Multiple Non-Destructive Signal Sampling

Konstantin D. Stefanov, Martin J. Prest, Mark Downing, Elizabeth George, Naidu Bezawada and Andrew D. Holland  
*Sensors* **2020**, *20*(7), 2031; doi: [10.3390/s20072031](https://doi.org/10.3390/s20072031)
